SUMMARY

Senior Product Designer for fintech and enterprise products. I make complex, data-heavy tools simple and build design systems that scale.

Product designer since 2016. Since 2022 I've worked on fintech and enterprise tools. Before that I spent almost five years as the only designer at a developer education company with 200,000+ students. Most recently I led a full redesign of a regulated investment platform on web and mobile, from a new design system to production, in 5 months.

EXPERIENCE

SmartCrowd | Lead Product Designer

Jun 2025 to Jul 2026

MENA's first regulated real estate investment platform, licensed by the DFSA. Web and mobile.

- Redesigned the whole product on web and mobile in 5 months, from onboarding to property search, checkout, wallet and portfolio. All of it shipped.
- Built the design system from scratch: tokens, light and dark themes, complex components. Developers built the new product on it.
- New user sign-ups grew 20% after the onboarding redesign.
- Worked daily with product and engineering, and with compliance and finance on regulated flows.
- Started with a 2-week platform audit, then got invited to lead design. Mentored a designer on the team.

Fozzy Group (Silpo) | Senior Product Designer, part-time contract

Jun 2024 to Aug 2025

Back office for one of Ukraine's largest retail chains: products, prices, delivery, dark stores, pickers.

- Worked in the core team that owns the shared base of the back office.
- Grew and maintained the back-office design system used by other product teams.

SPD Tech | Senior Product Designer, contract

Dec 2022 to Jun 2025

Software development company. I designed products for its clients in the US, Australia and Mexico.

- Space Needle, Seattle: ticketing for 1M+ visitors a year across admin panel, kiosks, box office and web, plus guest media experiences. Long-running client.
- Notary HUB: remote online notarization platform for the US market, built around compliance and MISMO standards.
- Dan-Mon Fairwind: enterprise CRM from sales to supply, with data-heavy modules and a shared pattern library.
- Mentored a designer for several months on a client project.

BitterBrains (Vue School) | Product Designer

Sep 2018 to Apr 2023

Developer education company behind Vue School, Mastering Nuxt and the official Vue.js Certification. 200,000+ students, 1M+ yearly users.

- First and only designer. Joined a team of 5 and stayed while it grew to 30+.
- Designed every product of the company, including learning platforms and the official Vue.js Certification.
- Owned all visual design at the company: conference media for online and offline events, plus illustrations for products and marketing.
- Grew from UI/UX designer to product designer.

Wandr | UI/UX Designer

Jul 2016 to Mar 2018

- Designed websites and mobile apps for client projects and early-stage startups, from user flows to final UI.

EDUCATION

Kyiv National University of Technologies and Design

2015 to 2017

Bachelor's degree, Graphic Design

Cherkasy State Business College

2011 to 2015

Junior Specialist, Graphic Design
